PROFESSIONAL SUMMARY

Backend Developer with experience developing APIs and applications using Java (Spring Boot) and Node.js. Track record spanning corporate environments—participating in monolith-to-microservices migrations—and independent freelance projects. Final-year Systems Engineering student (UTN) with C1 English proficiency, seeking to join global development teams.

WORK EXPERIENCE

Backend Developer | *Kenility*

April 2026 - August 2026

- Actively participated in migrating a monolithic system to an event-driven **microservices** architecture within the backend team.
- Designed, developed, and refactored multiple REST API endpoints using **Java and Spring Boot**, enhancing code modularity and performance.
- Collaborated on relational and non-relational database integrations in an Agile environments.

Full Stack Developer | *Self-Employed*

March 2026 - April 2026

- E-Commerce Platform (Shim): Developed the full-stack architecture for the web client (**React**) and backend infrastructure on **Firebase**. Programmed serverless cloud functions with **Node.js** and integrated payment and logistics gateways.

Full Stack Developer | *De Novo S.A.S*

August 2025 - March 2026

- Procurement System (Construction Company): Designed and built a procurement management system from scratch using **Java and Spring Boot.** Developed a robust and secure REST API to manage material orders and delivery notes.
- Corporate Website (Construction Company): Implemented UI/UX enhancements and load-time optimizations using React.

TECHNICAL SKILLS

- Backend: Java (Spring Boot), Node.js, REST APIs.
- Database: PostgreSQL, MySQL, Cloud Firestore (NoSQL).
- Frontend: React, Next.js, TypeScript, JavaScript, HTML5/CSS3.
- DevOps & Tools: Git / Github, Docker, CI/CD, Cloudflare.
